

## Artificial Grass Accessory

## ZEOFILL

## Specs

Perfect accompaniment for coated sand infill

Helps reduce pet urine odors

Natural/Organic

1lb / sq ft.

## **Features**

Zeolite has cooling properties that are similar to Transpiration which is water within a plant and the subsequent loss of water as vapor through stomata in its leaves. The natural mineral zeolite (e.g. porous aluminosilicate) has the property to naturally attract (absorb) water vapor for long periods of time and to incorporate it in its internal crystal lattice while releasing heat at the same time.
