MAYA

Maya grass was designed for high wear and traffic while still looking beautiful enough for any residential application. It's tufted with a highly texturized thatch yarn showing in the face of the turf. This bulky thatch system provides added body to the turf allowing the blades to stand up and bounce back when compressed, delivering performance and durability.

FEATURED BENEFITS

- ☑ *S-Blade Riviera products features our exclusive Luster Guard™ yarn technology. This new technology results in an extremely low luster and more natural looking grass while still maintaining complete ultra-violet stability.*
- ☑ *S-Blade yarn is extruded with a very precise ribbed texture on the surface of the blade. This ribbed construction eliminates weak points in the fibers creating unprecedented split resistance without sacrificing plush, "soft to the touch" blades.*
